

“Understandably enough the Bodyshop Fellowship is very keen to give it's full backing to anything that enhances the professional standing of accident repair centres. As such, the new British Standards Institution Kitemark accreditation, for bodyshops, undoubtedly represents the biggest major innovation our industry has seen for a very long time, and it is here to stay.

Recognising that many of our members will want to find out more, and eventually secure PAS 125 accreditation, we wanted to build a relationship with an established company who could give our members the help and support they needed, on a national basis. Help and supported that could be supplied by a team of field based operatives fully experienced in bodyshop routines and management. Therefore, the logic was to bond with a company that could provide all of this, and who had the credibility of being a member of the Thatcham B S I Kitemark Associate Consultant programme.

Not only did C W M C PAS Plus meet this criteria; their delivery method included manuals and, we believe, uniquely on line internet working modules. In this way bodyshop staff can move steadily from the initial gap analysis, through to their B S I audit at their own pace. Clearly CWMC can demonstrate that they have the specialist skills needed to assess any bodyshop, while having the working flexibility to bring about any changes necessary, and implement procedures, needed to achieve results.”
